

## Technical sheet

Ref. 081334

## 1 m JUNIOR bending machine

**Technical description**

Short apron (15 mm) for making close folds  
 Clamping pressure of the folding beam to hold the sheet according to the material and its thickness  
 Rotalame cutter optional extra

**Actions :** To cut / To fold

**Trades :** Metal

The JUNIOR folding machine is the on-site folding machine specially designed for zincwork. Incredibly mobile, it allows you to do all common folds directly on site.

**FEATURES**

Inventor of the 3-in-1 concept  
 Compact and light, the JUNIOR folding machine is perfect for on-site work  
 This complete machine is used to fold, hem and cut (with optional extras)  
 Unrivalled upper beam opening of 100 mm  
 The support bar integrated into the legs facilitates folding  
 Includes a pin to hold in the closed or open position. Spring-assisted opening of the folding beam  
 Rotalame in universal aluminium (created by the product maker) for all Dimos folding machines  
 Straightness of the Rotalame cutter on a guide rail  
 6 bearings ensure excellent cutting precision  
 Ergonomic aluminium handle
